GIIS 2016

2016 Global Information Infrastructure and Networking Symposium
- *GIIS 2016* -

Porto, Portugal
October 19-21, 2016

Preliminary Call for Papers

The Global Information Infrastructure and Networking Symposium (GIIS) consists of an interrelated set of technical, policy, and social issues implicit in the development of national and international (global) information infrastructures and networks. GIIS aims at identifying and promoting the exchange of knowledge on these interrelated issues and provides liaison to bodies in the global society, technical fora and international standards. GIIS 2016 follows the success of the precedent editions and intends to promote interdisciplinary conference sessions to discuss, build and further the use of national and international information infrastructures and networks. The conference also aims at providing a forum for the participants to broaden professional contacts and for technical discussions and interactions on specific information infrastructure and networking topics. Information Infrastructure and Networking (IIN) brings together information processing applications, communications networks and services, physical and software elements in networks, and end systems. The program of GIIS 2016 will include invited talks and keynotes, paper presentations, tutorials, panel, and discussion sessions.

Organization Committee

General Chair

Pascal Lorenz, , University of Haute Alsace, France

TPC Co-Chairs

Isabel Praça, Polytechnic of Porto, Portugal

Rami Langar, Univ. of Paris 6, France

Publicity Co-Chairs

Periklis Chatzimisios, ATEITH, Greece
Sidi Mohammed Senouci, University of Burgundy, France
João Soares, Polytechnic of Porto, Portugal
Filipe Sousa, Polytechnic of Porto, Portugal

Publication Co-Chairs

Pedro Faria, Polytechnic of Porto, Portugal
Hichem Sedjelmaci, uB, France

Regular Tracks

Regular Track 1: Communication Software, Services and Systems
Track Chair: Lyes Khoukhi (University of Troyes, France) and Bryan Riley (Ohio University, USA)
Regular Track 2: Wired / Wireless Communication, Networks and Information Infrastructure
Track Chair: Sidi Mohammed Senouci (University of Burgundy, France) and Hoon Ko (Sungkyunkwan University, Republic of Korea)
Regular Track 3: Telecom Policies and Development of Global Access
Track Chair: Periklis Chatzimisios (ATEITH, Greece), RangaRao Venkatesha Prasad (Delft University of Technology, Netherlands)

Special Tracks

Special Track 1: Sustainability in Energy and Buildings
Track Chair: Zita Vale (Polytechnic of Porto, Portugal) and Adrien Bécue (Airbus DS Cybersecurity, France)
Special Track 2: Smart and Secure Environments
Track Chair: Goreti Marreiros (Polytechnic of Porto, Portugal) and Peter Mikulecký (Univ. of Hradec Kralove, Czech Republic)

Important Dates

Submission	Notification	Camera Ready
May 30th 2016	September 8th 2016	September 26th 2016

Authors Instructions

Submissions should be original and limited to 6 double-column pages (Maximum of 2 additional pages allowed - 8 pages in total - with over-length page fee) and should follow IEEE paper templates. Papers are to be submitted electronically on the EDAS web site of the conference in PDF format.
